The MAI. Period for Reply	LING DATE of this commu	nication appe	ears on the co	er sheet with the c	orrespondence ad	dress				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).										
Status

DETAILED ACTION

Specification

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5, 8, 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Chang (Pub. No. US2001/0030953).

Claim 1, Chang teaches a method for providing forward link packet data service to mobile stations (MSs) in a mobile communication system (FIG. 8, page 1 paragraph [0007], page 5 paragraphs [0073]-[000076]) referenced by the Concurrent Service 80a of the MS to the Packet Data Service Node through the Source Base Station in a CDMA mobile communication system, the method comprising providing by a cell in the mobile communication system data transmission service via a forward link (FIG. 6, page 4 paragraph [0058]) referenced by the use of Cell Identifier parameter to establish the data transmission with the Source Base Station, indicating to an MS that the cell will not

provide data transmission service to the MS via the forward link (FIG. 8, page 5 paragraphs [0073]-[000076]) referenced by the BS Ack ORDER message 80I from the Target Base Station to the MS which indicates the Source Base Station will not provide data transmission service.

Claim 2, Chang teaches wherein providing data transmission services comprises providing data transmission services to the MS (FIG. 8, page 3 paragraph [0033]) referenced by the concurrent service inclusive of packet services to the MS, and wherein indicating that the cell will not provide data transmission service to the MS comprises indicating by the cell that the cell will no longer provide data transmission service to the MS via the forward link (FIG. 8, page 5 paragraphs [0073]-[000076]) referenced by the BS Ack ORDER message 80l from the Target Base Station to the MS which indicates the Source Base Station will no longer provide data transmission service.

Claim 5, Chang teaches determining whether the cell is presently available to provide data transmission service to the MS via the forward link of the cell (FIG. 8, page 6 paragraphs [0078]-[0084]) referenced by the determination of the transmission of the BS Ack ORDER 80I if the data transmission to the Target Base Station is available and complete.

Application/Control Number: 10/728,052

Art Unit: 2664 .

Page 4

Claim 8, Chang teaches wherein determining whether the cell is presently available to provide data transmission service to the MS via the forward link of the cell (FIG. 8, page 6 paragraphs [0078]-[0084]) referenced by the determination of the transmission of the BS Ack ORDER 80I if the data transmission to the Target Base Station is available and complete, comprises receiving an indication that the cell is presently unavailable to provide data transmission service to the MS via the forward link of the cell (FIG. 8) referenced by the HANDOFF REQUEST 80c upon which the Target BS determines unavailability of the data link of the MS to the Source BS.

Claim 10, Chang teaches wherein providing data transmission services comprises providing data transmission services to the MS by the cell via the forward link (FIG. 8, page 3 paragraph [0037], page 5 paragraphs [0073]-[000076]) referenced by the Concurrent Service 80a of the MS to the Packet Data Service Node through the Source Base Station in a CDMA mobile communication system.

Allowable Subject Matter

2. Claims 15-32, 33-41, 42-47, 48-51 are allowed.

Claims 3, 4, 6, 7, 9, 11, 12, 13, 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. The following is a statement of reasons for the indication of allowable subject matter: The prior art search did not disclose a CDMA mobile communications system wherein the mobile station is adapted to determine to switch from a serving cell to a target cell and further adapted to receive indication that the target cell is unavailable to provide the data transmission service.

Citation of Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pub. No. 2003/0169705, Knisely et al. discloses a method for cell switching in wireless communication systems. Pub. No. 2003/0142648, Semper discloses a system and method for providing a continuous high speed packet data handoff. Patent number 6330449, Kim discloses a soft handoff method in a cellular mobile communication system.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John L Shew whose telephone number is 571-272-3137. The examiner can normally be reached on 8:30am - 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wellington Chin can be reached on 571-272-3134. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
